*When converter charging pump replacement is required, only a new factory built and tested pump should be used. Proper operation of converter and transmission is dependent on an efficient charging pump. Damage possible by use of a field rebuilt pump can result in repair costs exceeding cost of a new pump alone.

*Quand on doit échanger la pompe de charge du convertisseur, on doit utiliser seulement des pompes construites en usine et testées. Le bon fonctionnement du convertisseur et de la transmission dépend de l'efficacité de la pompe de charge. D'éventuels dommages créés à cause de l'utilisation d'une pompe réparée sommairement sur le terrain peuvent coûter plus cher en réparation que le prix d'une pompe neuve.

*Wenn es notwendig ist, die Drehmomentwandlerersatzpumpe auszuwechseln, soll nur eine fabriekneue und geprüfte Pumpe verwendet werden. Fachgerechte Betätigung des Wandlers und des Getriebes beruht auf einer einwandfrei arbeitenden Ladepumpe. Durch Verwendung einer selbst umgebauten Pumpe entstandener Schaden kann die Kosten einer neuen Pumpe leicht übertreffen.

*Quando a substituição da bomba do conversor for necessária, somente uma nova unidade manufaturada e testada pela fábrica deve ser usada. O correto funcionamento do conversor e da transmissão depende do trabalho eficiente da bomba de acionamento do conversor. Possíveis danos pelo uso de uma unidade localmente recuperada pode resultar em despesas de reparação, cujo preço venha a ser mais elevado do que a aquisição de uma nova bomba.

*Cuando haya que reemplazar la bomba del convertidor, solamente debe usarse una bomba nueva procedente de fábrica y previamente sometida a ensayos. De una bomba eficaz depende el correcto funcionamiento del convertidor y de la transmisión. Los daños que puede ocasionar una bomba reconstruida sobre el terreno pueden representar costos de reparación superiores al precio de una bomba nueva.
